“Alchemy”

Alchemy is no mere fantasy,
but a philosophy
applied to the world,
to the elements,
to the animals,
and to man himself.

❖ The Diamond Alchemy Program

The Indigenous world traditions understood that the woman was the gateway between two worlds. Regardless of what you believe or how you pray, she is still the only way to cross into this reality.

Ancestral
Essence

Within her we can find the mysteries to this world and the power to create life upon it.

Diamond as the Alchemical Crucible

The Philosopher's Stone may be equated with the Causal Body, the Resurrection Body, or the Immortal Body. It is a vehicle for consciousness to inhabit, which is qualitatively different than the Astral Body, a double of the physical body.

Alchemy strives for the experience of spiritual rebirth through the union of opposites, or the sacred marriage. The Philosopher's Stone is also a symbol of the embryonic Self. It is the product of the sacred marriage, which has been characterized in alchemy as the union of the Sun (+) and the Moon (-). This marriage creates a bond by which opposites are united in an image which transcends both original potentials. The whole art of alchemy is contained within the image of a magical or divine child.

One of the alchemical goals is to create an eternal body for post-mortal continuation of the spirit and the soul. Both the western and Chinese alchemists felt this could be accomplished in a lifetime, with the help of God, or the Self. This vessel for immortality is the Diamond Body. Alchemy, like Jungian psychology, is a creative discipline which embraces all things from the standpoint of soul.
