Yvonne has worked with sound for many years, facilitating workshops locally and nationally. She holds a distinction in music education through Access to Music (RNCM and Manchester). She has a relaxed style of teaching and helps unconfident and non-singers to find their 'own special sound' to aid in self healing relaxation and transformation. Yvonne is also an Antanea Colour Therapy masseur/practitioner.

David's one true passion in life has always been writing music. After joining The Light of Hope CIC in 1999 he began to specialise in creating music for meditation and relaxation, and soon secured a successful commission for an NHS music related research project. He is now a practitioner in sound healing having trained for 12 months at The British Academy of Sound Therapy at Chichester University.
