The Diamond Light Codes

In this booklet you will find a brief summary of the meanings and action of the 26 Diamond Light Codes of Series 1 as well as the 13 codes of Series 2. The Series 2 codes have a distinctly lighter and finer vibrational quality to them. The understanding of the Light Codes is an ongoing process of evolution as they are multi-layered and multi-dimensional aspects of streams of cosmic consciousness.

This means that as you work with them, you will discover your own unique relationship with the Universal source – your Divine essence – through the actions of the codes within your own energy fields.

My suggestion to you is to play with them and be aware of the subtle energy shifts that take place as you interact with the Light Codes. The information that is given here should be treated as a guideline only as this represents a brief introduction to what I have been given to date about each of the codes. I have no doubt that you will discover much more through your own journey with them!

I also welcome any feedback from you regarding your experiences with the Diamond Light Codes, so please feel free to share your encounters with them.

With love and diamond blessings

Julie

A Brief Introduction to the Diamond Light Codes

Here is a brief summary of the information I was given by Spirit about the Diamond Light Codes and how they work. As with all so-called channelled information, feel for what is right and true for you.

- The Diamond Light Codes are an aspect of living consciousness often referred to as the Language of Light. It is a language that our soul knows and which connects us to the magnificence of our true being and original source essence
- The Diamond Light Codes are both contained within the Diamond Light Grid, as well as facilitate an awakening to the energy frequencies of the Diamond light body. In other words, when you work with the diamond (Diamond Light Grid) you awaken the codes, and when you work with the codes, you help to build the light body.
- The Light Codes work at the level of our DNA, providing energy transmissions to repair areas of our DNA that have become scrambled or 'incoherent' in how the genetic code is expressed, resulting in illness and dis-ease. This includes past life patterns we have coded into our DNA, as well as negative patterns that have been coded into our DNA strands in our existing life or experiential timeline. In other words, they help to re-code our DNA for the highest expression of who we are.

Therefore, both the codes and the grid provide coherent energy to repair the electrical circuits in our body and awaken sections within our DNA that have up until now been unusable (ie the so-called junk sections). It is within these sections that some of our greatest potential as spiritual beings is realised and brought into physical expression

- The background colour of the Light Codes is important as this helps to set the frequency for the body to accept the energy and imprint of the code itself.
- The Light Codes also have an accompanying sound which is a harmonic combination of various tones. There is therefore not one specific tone associated with the codes, rather a musical expression. (The more you work with the codes, the more likely you are to hear their music!)
- Our DNA is continually being re-created and what it does is dependant on our emotional and energetic responses to life situations and circumstances. All of our emotions have chemical analogues that our DNA codes for and each of these chemicals has a complex vibrational waveform or geometric configuration. The Light codes help to disrupt our habitual though-emotion-behaviour feedback loops, by transmitting the geometric configurations associated with our perfected state.

In brief:

"The Diamond Light Codes"
are symbols representing Geometric structures of light. They are a language that awakens dormant aspects within your DNA, helping to align you with the frequencies of energy streaming on to our planet. They hold and transmit holographic information that helps to bring change to your worldas within, so without....."

SPECIAL NOTE

Please be aware that the codes emit a holographic field approximately 3 feet from the image, and as such create an information transfer conduit whenever you are in this field. I recommend not working with more than 3 codes at any one time as to do so is to overwhelm the subtle energy bodies with multiple layers of information that then need to be processed through the physical body.

One client loved the codes so much she placed them all above her bed without realising this, and as a result never had a good night's sleep for many months as her body was too busy processing the multiple fields of information while she was trying to rest! Use your intuition and be aware of the effects on you.

Stop looking for the big 'mission' and value all of your experiences in body as a function of your purpose - Take heart that you are always connected to the ultimate trajectory of your life, even if it appears you may be taking a temporary 'detour'. - Use this code to connect with your innate Well of Wisdom

Using the Light Codes

The impact and effect of the diamond light codes in your energy field will be as unique as you are and as a result there is no 'fixed' way of working with them. The most important thing is to allow yourself to be guided by your own intuition when you are drawn to a particular code. The images with their geometries, colours and subtle coded messages work beyond the level of the conscious mind and when you give the intent to work with any of them, they will do so in a way that is appropriate and perfect for you.

The Diamond Light Codes are an aspect of living consciousness, and in my own journey with them I have felt them vibrationally as well as actually hearing them with either words or music. Both myself and others have even heard them singing their own beautiful songs!

The guidelines below are therefore merely ideas and suggestions to help get you started in working with this amazing language of light.

Some Suggested ways of working with the Light Codes

1. Meditation

- Select the Light Code you are drawn to (whether by conscious attraction to the design or allowing yourself to select from the cards placed face down in front of you)
- Place it at eye level where you can spend a few moments allowing the code to be imprinted in your energy field via the optic nerves.
- Begin breathing deeply and rhythmically and imagine that you are breathing in the energy of the light code into your body.
- Close your eyes and hold the image of the code with your inner vision, then give intent for it to act wherever it needs to work in your body.
- Simply relax, continue breathing and feel what happens energetically in your body.
- You can also meditate on the specific qualities of the light code giving intent for your energy fields to be re-programmed through the action of the code.

2. Using the Codes as an Oracle

- Connect with your Higher Self and ask to be shown what energy / information will support you as a consciousness focus for the day.
- Shuffle the cards and allow yourself to choose a card
- Read (or intuit) the meaning of the code and ask how it can support you in expanding your spiritual understanding or growth.
- Maintain your focus on the code for the day

3. Charging up Liquids, Food

We know from the well known work of Dr Masaru Emoto that words and images create changes in water structure as seen in the beautiful crystals created with positive intentions.

In the same way, the diamond light codes can be used to imprint their energy into food and water so that our body and DNA is re-programmed as we take in our daily nourishment. Simply cover your chosen code with a plastic film (for protection) and use it as an energy plate to charge up liquids or meals prior to ingesting.

4. Vibrational Essences

Create your own vibrational essence for light codes you wish to work with. Fill two thirds of a 30ml dropper bottle with pure water and stand on a laminated print of the light code for 24 hours with the intent that the water be charged with the code energy. I often encircle the code with clear quartz crystal points to amplify the intent.

Once charged up, then top up the dropper bottle with brandy, mix well to infuse the mixture fully and take 7 drops at a time on the tongue as needed.

Above all else, allow your intuition to guide you in respect of the information that the Light Codes bring into your energy field and what they awaken within your DNA. There are many layers and levels of information within each of the light codes that unfold as you journey with them!

Wishing you much love and abundant blessings on your journey back to the magnificence of your divine self!
