The Cosmic Playground of the Diamond Light Codes

The Diamond Light Codes

- Activating Higher Consciousness Potentials
- Arise from and also Activate and Support the Diamond Light Grid or Matrix
- Open portals into Christ Consciousness frequencies
- Are part of the Language of Light and therefore provide information
- Subjective and Intuitive connections and interpretations
- May be perceived through sound and additional senses
- Stimulate Divine Fire, Shakti. Kundalini
- Adjust and provide for DNA reconfiguration

About Light

- Light is the commonly used name for a range of *electromagnetic radiation* that can be detected by the human eye.
- Light is actually ALL frequencies of the electromagnetic spectrum, even those we can't see, and ranges from x-rays and gamma rays to all visible frequencies
- Each frequency has a different action on the body, and the intensity of this is dependant upon factors such as amplitude of the wave form. Light therefore conveys information about itself through interaction with specific frequencies.
- Light as information is both a carrier wave and a particle
- Light 'folds' on itself resulting in discrete 'packets' of information presented or perceived through the resultant geometric forms.
- All of life (sentient and non-sentient) is light!

❖ About Light

“There is a Light Grid within the body which registers all units of biological-electrical radiation at low frequency field levels”

“Every molecule within the body continually projects light pulses which build up a light code structure which is beyond the physical relativity. This code structure is used to reshape the next program of consciousness evolution”

The Power of Shape

- Aetheric energy can be scooped, directed, focused, flowed, intensified, and in general controlled by geometrical shapes and patterns, and mind or thought (visualization).
- Aetheric energy in its myriad forms is the basic life force of the universe and as such is the basis of all the phenomenal universe.

Dan Davidson, Shape Power

- In a triangle or pyramid, the greatest concentration of aetheric energy is at a position one-third of the height of the shape. This is especially so when the energetic flow is in a natural curved manner (think spirals.)

◆ Geometry and Biology

- The regulation of all activities in the human body is mediated by Proteins
- Proteins are chains of amino acids produce by gene sequences in the DNA
- These chains fold in on themselves to create complex 3-dimensionasal structures and configurations
- The shape of the protein is paramount to its proper functioning in the human body

Phosphenes

Traditional Definition: A visual occurrence characterized by seeing light without having light actually enter into the eye. The most common phosphenes are pressure phosphenes. Rubbing the closed eyes stimulates the cells of the retina. The optic nerve translates this pressure into various images.

Causes : Vaso-dilation, pressure on eyeballs, electrical stimulation, Drug induced (eg alcohol), hallucinogens (eg DMT)

ENTOPTIC - generated from within

Phosphenes

15 main categories of electrically induced Phosphene images

DMT

Dimethyltryptamine (DMT) is a naturally-occurring psychedelic compound made up of carbon, hydrogen and nitrogen. It exists in several plant species and trace amounts are found in the human body.

Plants containing the compound have been used in religious ceremonies for thousands of years. Users claim to experience a lucid extra-dimensional plane of reality. Research scientists have affirmed that these DMT users may be at least partially correct

DMT

- A known psychadelic, inducing internal experiences
- Produced by our own pineal gland
- Requires a threshold level to be reached before visual phenomena result
- Complex imagery and 'real' alternate time space experiences eg. UFO's, alien life forms, fractal geometries and patterns
- The experience appears to be dependant upon the level of consciousness of the individual
- Experiences beyond the recognised phosphene phenomenon, having profound effects on human consciousness
- Formal studies in DMT effects conducted by Rick Strassman, "DMT : The Spirit Molecule"
- A 'gateway' into alternate dimensions and realms

It is estimated that approx, 2% of the population have the ability to spontaneously generate amounts of DMT above the threshold required for altered state experiences.

This may also be linked with electrical stimulation of the pineal gland through spontaneous kundalini arousals and awakenings

EMT + Meditation

What do I have to do?

- Transmission tower pulling out signals (??) fix it??
- Symbols flicking

- Spine - Creation of a new spiral chart with symbols/colours/sounds for each area of the spine (ie DNA)
- Input symbols, colour sound using DNA word
- Library of symbols that will be used
- Trying to work with old energy
- "Wheels" aren't legal - movement in the wrong direction
