#### Learning the Language of Light through Colour

This interactive and stimulating 2-day workshop will introduce you to the fascinating language of colour and light

Understanding the impact that colour has on us at many different levels, *is* literally like learning to speak a new language. When we learn to communicate with the world around us through the non-verbal messages of colour, it opens up deep insights for us as individuals and also enhances our perceptual and intuitive abilities. You will be amazed at how much you already know that is simply waiting to surface from your subconscious as we **all** respond to the energy of colour at subtle levels.

In this workshop you will come to understand more about the impact that colour has on your life, and on your emotional, mental and physical well-being. You will learn practical ways of working with colour as well as how to do either a 3 or 9 colour reading that looks at all aspects of your life. Also amaze your family and friends with the information that is revealed

We use the beautiful '**Oils of Transformation**' colour set to play and explore this magical language. This comprises 13 different coloured oils, designed to stimulate the senses and awaken your perceptions.

The workshop also introduces you to the "**Angels of Transformation**", which are sprays to balance your energy centres and are used for space clearing and harmonizing. This workshop will teach you about chakras, dowsing, space and energy clearing, colour readings and how to incorporate the magic of colour into any other therapy.

Contents of this workshop include :

- AN INTRODUCTION TO LIGHT, COLOUR AND THE ELECTROMAGNETIC SPECTRUM
  - HOW WE SEE OR SENSE COLOUR
  - THE POSITIVE AND NEGATIVE ATTRIBUTES OF KEY COLOURS
  - THE LINKS BETWEEN COLOUR AND THE CHAKRA SYSTEM
  - HOW TO 'READ' THE MEANINGS IN COLOUR SELECTIONS
